

FILM CAMP

We will discover the wonderful world of videography, using cutting edge technology and, most importantly, our vivid imaginations! Students will brainstorm and collaborate on a student-made short film that will be shot entirely on campus. Time will be spent discussing the history of film, film-making and script-writing process, as well as assigning roles to every student (ex: director, lead actor, video editor, cameraman/woman, etc.). We will concentrate on filming and editing sessions based on our student written script.
