

LEAPS

Signature Program
The Winston School Summer Camp

Ms. Maria Halkias & Mr. Ian Hassan Instructors

What is LEAPS?

LEAPS is our acronym for Literature, Engineering, Arts, Problem Solving, and Science, and is Winston's new, cross disciplinary summer enrichment program. It is a Literacy program that connects problem solving skills with well-known children's literature. Students will have the opportunity to explore key science topics including robotics and coding while also engaging in hands-on applications and investigations. Students in grades 2-8 will also be able to express their creativity and develop their problem-solving skills through art projects and engineering challenges. Our program structure will also provide opportunities for the students to take LEAPS forward in their collaboration skills as they develop their own unique innovations to overcome the challenges presented.
