

Dear Primary School Parents,

Our school community continues to monitor ongoing health concerns and daily developments as provided by our State and Federal agencies. Our administration is working with faculty and staff to fine-tune our procedures and ensure that learning will continue to take place, uninterrupted, should a need arise for school closure. As our plans for remote learning will include online access between Winston staff and students, we would like your support in the usage of school-provided devices in an off-campus environment. Should it be necessary for a remote learning environment, specific instructions and school day procedures will be shared with all students and families.

Our Primary School utilizes a 1:1 iPad program in various ways throughout the school day to compliment and support various instructional skills. It may be necessary to send home the iPad for continuous educational use and learning support at home. A home internet connection will be needed to have full access to web-based programs. Students may only use these devices for school-provided programs and with teacher-provided directions. Students will be responsible for returning iPads and chargers upon their return to school.

Before receiving an iPad for use at home, parents and students should review the following information. A parent must sign/return the attached form as soon as possible.

Warm regards,

Daniele Kass

Primary School Division Head
