

Winston Printing Policy

During this period of remote learning, there may be times when students will need to print hard copies of certain documents. When this situation arises, the student should log into their Google Drive or Google Classroom on any device in the home which is already connected to a home printer. In other words, rather than install the printer onto your student's Chromebook, simply log your student in to a different device which is already setup to print.

This will mitigate any confusion or errors that may occur from attempting to install the printers onto the Chromebook. Some home printers may not be compatible with Chromebooks.

To be clear; students should still complete assignments and all class work from their Chromebooks. But printing specifically from their Chromebooks will not be necessary.

Thank you.
